Bill tells me he's going to UPS on Monday to send things out. That's as 47 copies; there are quite a few people who will not be getting one. Some of them expressed interest but never followed up; others said a check was in the mail but one was never received. In both cases, we have reserved a copy for you and will hold it for a little while. I'll put out a listing soon, telling who is who so you can respond if you wish to get your copy. 73 and Queue Our Pea DE WA8MCQ

This is the current Milliwatt reprint status as of 22 October 1994--Bill has the copies in hand and will go to UPS on Monday to ship them.

Three lists follow; the first shows those who have paid-up orders and who will get a copy soon. The second list contains those who told me they had a check on the way but none was ever received. (In some cases it has been many weeks.) If you are on that list, you will not be receiving a copy until I get your check; since they were sent through the US mails, I'd consider them lost or stolen. (If you can easily check with your bank via one of those touchtone telephone inquiry systems, you might want to see if the check has cleared. If it has, please contact me immediately. It may have slipped through the cracks here, but was most likely stolen.) This list also includes some overseas people whose payment has not been received. They have been instructed to send their charge card info to N8ET, but none has been received yet. Everyone on list two will have their reserved copy held for a "reasonable" time before it is put on the open market.

The third list contains people who expressed an interest at one time, but I never heard from them again, even after I sent more messages. If you still want your reserved copy, please let me know; otherwise they will be sold on the open market.

List 1--you should get your copies shortly. Please let me know by e-mail when you get it, if you think of it.

List 2--if you still want your copy, please let me know immediately by e-mail, and drop another check in the mail. If your first check ever shows up I'll either return it with VOID written all over it or destroy it (ripped up and tossed in the garbage disposal). For the overseas folks, please send your charge card info to N8ET. You can do it by e-mail if you feel comfortable doing that, or send it by snail mail but send both of us an e-mail to let us know it's coming so we can hold your copy.

List 3--if still interested in a copy, please let me know immediately by e-mail. It wouldn't hurt to contact me by phone to be safe, since e-mail has repeatedly proven itself less than 100% reliable--things disappearing along the way without any reject messages or other clues that it died. Work phone is 410-290-1919 and home is 410-551-1633. If I don't hear from you very soon, your reserved copy will be unreserved.

For RSGB members, there's an excellent review of the QRP+ by George G3RJV in the November edition of RadCom.

Now, if only I had enough spare cash.... :->

I recently obtained an Index Labs QRP+ and found it not to my liking. I ended up returning it to the dealer that sold it to me. If anyone is seriously thinking about ordering one you may be interested in my experiences with it. One thing is for sure, the audio filtering is superb! I've never heard anything like it before. However dislikes outweighed the pluses (no pun intended). Anyway, I'd be glad to discuss it with anyone who's interested.

Harvey, K5DDJ
